

Industry: Financial Services

Solution: Security

# Financial services provider future-proofs its IT environment

 **LOGICALIS**  
Architects of Change

## CHALLENGE

A Dublin based financial services firm, with a global presence, made the strategic decision to move away from physical data centres and adopt a cloud-first strategy. They needed a strong security solution built in to their digital transformation that would be scalable and secure for the future.

## SOLUTION

Working with Logicalis Ireland to assess their needs, they decided to move to Microsoft Azure with Check Point as the accompanying security solution. With the new environment, the company has the ability to broaden the services it provides and better meet the requirements of the local team through greater availability and accessibility. As the technologies are provided on a subscription basis, they are continuously updated to deliver the latest versions and protections. Check Point, the core technology in Logicalis' Secure OnMesh offering, delivers security and cloud managed services through ongoing consultancy, detection and prevention support and maintenance. A highly scalable solution it allows the business to adopt an integrate other capabilities securely and with ease, future-proofing their systems.

## BENEFITS

- **Built in flexibility with a scalable solution** securely supporting future growth
- **Continuous support** and expertise available 24/7 to help with onboarding, alignment and management of end-to-end IT infrastructure and security.
- **Reduced global business costs** through a cloud-based solution targeted to deliver agility and scale

“This expertise across both cloud and security is exactly why we chose Logicalis Ireland and will continue to collaborate with them in the future.”
